

Bare Fiber Adapters

FIBERTRONICS 

Bare Fiber Adapters are typically used to temporarily join bare fiber to fiber optic equipment.

Bare Fiber Adapters are used as a medium to connect bare fiber to your fiber optics equipment. Designed with speed in mind, and are traditionally used for power meter hookups, temporary repairs, or quick fiber connections. These come with a low insertion loss and high quality polish.

Features & Specifications

- Easy installation
- Low cost
- Reusable with simple maintenance
- Available connectors include FC, LC SC and ST
- Works with 250 or 900µm fiber (for 250µm use 900µm tubing)
- All metal construction
- Low insertion loss
- Ideal for use in testing applications
